

THRU THE EYES OF THE PRESS

Largest Stock In Boro At Morris Plate Glass Co.

There is probably no building in the country, except perhaps the Washington Monument in Washington, D. C., that does not find use for considerable glass in its construction. Nowadays glass is used extensively in modern stores, factories and war plants, due to the excellent results obtained with glass brick walls. Glass is now a more important building product than heretofore.

One of the better stocked and dependable dealers of glass in this vicinity is the Morris Plate Glass Company, located at 67 Monmouth street, Red Bank. The business is owned by Max Morris and has been established 14 years. Joseph Cleary, a well-known resident of the borough, and long active in the fire department, has been employed by Mr. Morris since the business started.

The stock includes all the different sizes and grades of glass for every purpose. To name a few—auto glass, window glass, non-shatterable safety glass, bent glass, glass for furniture tops and desks, beveled glass and mirrors. The firm also carries a stock of paint, varnishes and wallpaper. One of the strict business rules is to sell only standard merchandise of dependable manufacturers. Whether you are an old customer or a new customer; a large buyer or a small buyer you will receive the same prompt and courteous service.

As this is the time of the year when many housekeepers are planning to paint various articles of furniture in the house, may we suggest that they consult Max Morris and get his advice on the new color schemes and the correct kind of paint to use for the particular article to obtain the best results. Mr. Morris carries a full line of Keystone paints and the products of this manufacturer have long been acclaimed as the most outstanding for home use.

Morris Plate Glass Company has attained a steady growth of business throughout this section of the county and the progress made can be attributed to quality merchandise and reliable business methods. Max Morris tries to please every customer in this somewhat competitive field. He will submit an estimate for any kind of glass in any quantity. Prices are correct and he will always try to make deliveries at the time specified. However, due to the labor situation, priority rulings and government regulations it is some times necessary for the customer to allow a little longer time to fill his order.
